A handwritten signature in black ink, appearing to be 'K. Crowley', written over the 'From:' line.

Subject: MSDS Memo for Duracell Lithium Manganese Dioxide Batteries

The Material Safety Data Sheet for the Duracell Lithium Manganese Dioxide Batteries is applicable to the DBP-1400 and the DBP-2800 medical device accessories.

The DBP-1400 has five (5) Duracell Lithium Manganese Dioxide Battery cells in the assembly. The DBP-2800 has ten (10) Duracell Lithium Manganese Dioxide Battery cells in the assembly.

The MSDS for the battery cells addresses the hazards for the individual cells in application. Because the battery cells are individually packaged inside the DBP-1400 and DBP-2800, the information in sections A through E of the Duracell Lithium Manganese Dioxide Batteries MSDS is applicable with the exception of the shipping information in section E. The shipping information in section E is applicable to the individual battery cells, but not to the DBP-1400 or DBP-2800 assemblies since the overall lithium content of the assemblies is approximately 2.5 g and 5 g respectively. **When shipping internationally, to conform with IATA (International Air Transport Association) requirements, the DBP-1400 and DBP-2800 assemblies are classified as dangerous goods.**
