2.Hazard(s) identification

(a) Classification

This chemical is not considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200), This product is an article which is a sealed battery and as such does not require an MSDS per the OSHA hazard communication standard unless ruptured. The hazards indicated are for a ruptured battery.

| Skin corrosion/irritation | Category 2 |

Precautionary Statements - Prevention

Wash face, hands and any exposed skin thoroughly after handling;

Wear protective gloves/protective clothing/eye protection/face protection Do not breathe dust,fume,gas,mist,vapors,spray;

Do not eat, drink or smoke when using this product;

Precautionary Statements – Response

Specific treatment (see supplemental first aid instructions on this label) Get medical advice/attention if you feel unwell:

-Eyes

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center or doctor; -Skin

IF ON SKIN: Wash with plenty of soap and water;

If skin irritation occurs: Get medical advice/attention Take off contaminated clothing and wash before reuse;

Precautionary Statements - Storage

No information available.

Precautionary Statements – Disposal

Dispose of contents/container to an approved waste disposal plant

(c) Hazards not otherwise classified (HNOC)

No information available.

(d) Unknown Toxicity

10% of the mixture consists of ingredient(s) of unknown toxicity.

(e) Other information

No information available.

(f) Interactions with Other Chemicals

No information available.

4.First-aid measures

(a) Description of first aid measures

| First aid is upon rupture of sealed battery. |
|--|
| Show this safety data sheet to the doctor in attendance.Rinse immediately with |
| plenty of water, also under the eyelids, for at least 15 minutes. Keep eye wide open |
| while rinsing. Remove contact lenses, if present and easy to do. Continue rinsing. |
| Get medical attention if irritation develops and persists. Do not rub affected area. |
| Remove contaminated clothes and rinse the skin with plenty of water. Get medical |
| advice/attention if you feel unwell. |
| Remove to fresh air. If not breathing, give artificial respiration. If breathing is |
| difficult, (trained personnel should) give oxygen. Get medical advice/attention if you |
| feel unwell. |
| Rinse mouth immediately and drink plenty of water. Never give anything by mouth |
| to an unconscious person. Do NOT induce vomiting. Get medical aid. |
| Rinse mouth immediately and drink plenty of water. Never give anything by mouth |
| to an unconscious person. Do NOT induce vomiting. Get medical aid. |
| Ensure that medical personnel are aware of the material(s) involved, take |
| precautions to protect themselves and prevent spread of contamination. |
| |

(b) Most important symptoms/effects, acute and delayed

Contact with internal components may cause allergic skin sensitization (rash) and irritate eyes, skin, nose, throat, respiratory system. Cobalt and Cobalt compounds are considered to be possible human carcinogen(s).

(c) Immediate medical attention and special treatment

No information available.

5.Fire-fighting measures

| Suitable extinguishing media | Use foam, dry powder or dry sand, CO ₂ as appropriate. | z M |
|--------------------------------|---|---------|
| Unsuitable extinguishing media | No information available. | Fran Su |

(a) Special hazards arising from the chemical

Under fire conditions, batteries may burst and release hazardous decomposition products when exposed to a fire situation. This could result in the release of flammable or corrosive materials. Hazardous combustion products: CO,CO₂, Metal oxides, Irritating fumes;

(b) Special protective equipment and precautions for fire-fighters

Firefighters must wear fire resistant protective equipment and appropriate breathing apparatus. The staff must equip with filtermask (full mask) or isolated breathing apparatus.

The staff must wear the clothes which can defense the fire and the toxic gas. Put out the fire in the upwind direction. Remove the container to the open space as soon as possible.

Spray water on the containers in the fireplace to keep them cool until finish extinguishment.

ShenZhen Tiansu Calibration and Testing Co., Ltd.

Rep. No.:TCTTJ20201216787ZB-BR01

Page 5 / 11 Pages

6.Accidental release measures

(a) Personal precautions, protective equipment and emergency procedures

If the battery material is released, remove personnel from area until fumes dissipate. Provide maximum ventilation to clear out hazardous gases. The preferred response is to leave the area, dispose the case after the batteries cool and vapors dissipate. Provide maximum ventilation. Avoid skin and eye contact or inhalation of vapors.

(b) Environmental Precautions

Prevent material from contaminating soil and from entering sewers or waterways.

(c) Methods and materials for containment and cleaning up

If the battery casing is dismantled, small amounts of electrolyte may leak. Collect all released material in a plastic lined container. Dispose off according to the local law and rules. Avoid leached substances to get into the earth, canalization or waters.

7.Handling and storage

(a) Precautions for safe handling

Always follow the warning information on the batteries and in the manuals of devices. Only use the recommended battery types;

Keep batteries away from children. For devices to be used by children, the battery casing should be protected against unauthorized access;

Unpacked batteries shall not lie about in bulk;

In case of battery change always replace all batteries by new ones of identical type and brand;

Do not swallow batteries;

Do not throw batteries into water;

Do not throw batteries into fire;

Avoid deep discharge;

Do not short-circuit batteries Use recommended charging time and current;

(b) Conditions for safe storage, including any incompatibilities

If the battery is subject to storage for such a long term as more than 3 months, it is recommended to recharge the battery periodically;

And recommended at -5℃~45℃ for 1 month storage, at -5℃~35℃ for 3 months storage;

Do not storage the battery haphazardly in a box or drawer where they may short-circuit each other or be short-circuited by other metal objects;

Keep out of reach of children;

ACGIH TLV: American Conference of Governmental Industrial Hygienists -Threshold Limit Value; OSHA PEL: Occupational Safety and Health Administration - Permissible Exposure Limits Immediately Dangerous to Life or Health;

Other Exposure Guidelines: Vacated limits revoked by the Court of Appeals decision in AFL-CIO v. OSHA, 965 F.2d 962(11th Cir., 1992) See section 15 for national exposure control parameters;

(b) Appropriate engineering controls

| Engineering Measures | 1.Showers | |
|---|-----------------------|----|
| 7.1 年 5 年 5 年 5 年 5 年 5 年 5 年 5 年 5 年 5 年 | 2.Eyewash stations | 1 |
| | 3.Ventilation systems | 98 |

(c) Individual protection measures, such as personal protective equipment

| Eye/Face Protection | Not necessary under normal conditions, wear safety glasses if handling an open or leaking battery. |
|--------------------------|--|
| Skin and body Protection | Not necessary under normal conditions, Wear protective gloves and protective clothing such as long sleeved clothing, impervious gloves, chemical resistant apron, and antistatic boots if handling an open or leaking battery. |
| Respiratory Protection | Not necessary under normal conditions. If exposure limits are exceeded or irritation is experienced, ventilation and evacuation may be required. |
| Hygiene Measures | Handle in accordance with good industrial hygiene and safety practice, Avoid contact. |

Rep. No.: TCTTJ20201216787ZB-BR01

Page 7 / 11 Pages

9. Physical and chemical properties

| (a) Appearance | Prismatic |
|--|---------------------|
| (b) Odor | Odorless |
| (c) Odor threshold | Not available. |
| (d) pH | Not available. |
| (e) Melting point/freezing point | Not available. |
| (f) Initial boiling point and boiling range | Not available. |
| (g) Flash point | Not applicable. |
| (h) Evaporation rate | Not applicable. |
| (i) Flammability | Non flammable. |
| (j) Upper/lower flammability or explosive limits | Not available. |
| (k) Vapor pressure | Not applicable. |
| (I) Vapor density | Not available. |
| (m) Relative density | Not available. |
| (n) Solubility(ies) | Insoluble in water. |
| (o) Partition coefficient: n-octanol/water | Not available. |
| (p) Auto-ignition temperature | 130℃ £ ∰ |
| (q) Decomposition temperature | Not available. |
| (r) Viscosity | Not available. |

10.Stability and reactivity

| (a) Reactivity | Stable under recommended storage and handling conditions. |
|------------------------------|--|
| (b) Chemical stability | Stable under normal conditions. |
| (c) Possibility of hazardous | When heated above 150°C the risk of rupture occurs. Due to special safety |
| reactions | construction, rupture implies controlled release of pressure without ignition. |
| (d) Conditions to avoid | Do not subject the battery to mechanical shock. Keep away from open |
| A Villa Prime St | flames, high temperature. |
| (e) Incompatible materials | Strong oxidizer, strong acid. |
| (f) Hazardous | Under fire conditions, the electrode materials can form carcinogenic nickel |
| decomposition products | and cobalt oxides. |
| | |

11. Toxicological information

(a) Information on the likely routes of exposure

| Inhalation | Inhalation of a large number of vapors or fumes released due to heat may cause respiratory. |
|--------------|---|
| Ingestion | Ingestion of battery contents may cause mouth, throat and intestinal burns and damage. |
| Skin contact | Contact with battery electrolyte may cause burns and skin irritation. |
| Eye contact | Contact with battery electrolyte may cause burns. Eye damage is possible. |
| | |

Under normal conditions (during charge and discharge) release of ingredients does not occur. If accidental release occurs see information in section 4.

Swallowing of a battery can be harmful.

Call the local Poison Control Centre for advice and follow-up.

12. Ecological information

(a) Ecotoxicity

Water hazard class 1(Self-assessment): slightly hazardous for water.

- (b) Persistence and Degradability
- No information available.
- (c) Bioaccumulative potential
- No information available.
- (d) Mobility in soil
- No information available.
- (e) Other adverse effects
- No information available.

13.Disposal considerations

Safe handling and methods of disposal

Disposal should be in accordance with applicable regional, national and local laws and regulations. Local regulations may be more stringent than regional or national requirements.

Product disposal recommendation:

Observe local, state and federal laws and regulations.

ShenZhen Tiansu Calibration and Testing Co., Ltd.

Rep. No.:TCTTJ20201216787ZB-BR01

Packaging disposal recommendation:

Be aware discarded batteries may cause fire, tape the battery terminals to insulate them. Don't disassembly the battery. Completely discharge containers (no tear drops, no powder rest, scraped carefully). Containers may be recycled or re-used. Observe local, state and federal laws and regulations. The potential effects on the environment and human health of the substances used in batteries and accumulators, the desirability of not disposing of waste batteries and accumulators as unsorted municipal waste and of participating in their separate collection so as to facilitate treatment and recycling.

14. Transport information

The goods shall be complied with the requirements of Section IA\IB\II of Packing Instructions 965 and Section I\II of Packing Instructions 966\967 of 61st DGR Manual of IATA(2020 edition)or special provision 188 of IMDG CODE(Amdt. 39-18)2018 Edition.

The batteries should be securely packed and protected against short-circuits. Examine whether the package of the containers are integrate and tighten closed before transport.

Take in a cargo of them without falling, dropping, and breakage. Prevent collapse of cargo piles.

Don't put the goods together with oxidizer and chief food chemicals. The transport vehicle and ship must be cleaned and sterilized otherwise it is not allowed to assemble articles. During transport, the vehicle should prevent exposure, rain and high temperature. For stopovers, the vehicle should be away from fire and heat sources. When transported by sea, the assemble place should keep away from bedroom and kitchen, and isolated from the engine room, power and fire source.

Under the condition of Road Transportation, the driver should drive in accordance with regulated route, don't stop over in the residential area and congested area. Forbid to use wooden, cement for bulk transport.
