SECTION 4: FIRST AID MEASURES

Eye contact: Rinse immediately with plenty of water for at least 15 minutes. If eye irritation persists consult a specialist.

Skin contact: Wash off with soap and plenty of water while removing contaminated clothes and shoes. If skin irritation persists, call a physician. Wash contaminated clothing before re-use.

Inhalation: Remove to fresh air. If breathing is irregular or stopped, administer artificial respiration. In case of shortness of breath, give oxygen. Call a physician immediately.

Ingestion: If swallowed, call a poison control center or doctor immediately. Do not induce vomiting without medical advice. Never give anything by mouth to an unconscious person.
### SECTION 5: FIREFIGHTING MEASURES

**FLAMMABLE PROPERTIES**

**Fire / explosion**
Spontaneous combustion can occur should the product come into contact with hot fiber glass or mineral fiber insulation, especially when exposed to atmospheric oxygen. NFPA Class IIIB combustible liquid

**Suitable extinguishing media**
Water spray or fog, foam, dry chemical, CO2

**Protective equipment and**
In the event of fire and/or explosion do not breathe fumes. Wear self-contained breathing apparatus for fire-fighting if necessary.

**Precautions for firefighters**
Keep containers and surroundings cool with water spray. Do not use a solid water stream as it may scatter and spread fire. Collect contaminated fire extinguishing water separately. This must not be discharged into drains.

**Further information**
Continuous flow water fog stream should be used for fire-fighting as it prevents the spread of fire.

### SECTION 6: ACCIDENTAL RELEASE MEASURES

**Methods and materials**
Ventilate the area. Contain spillage, and then collect with non-combustible absorbent material, (sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local/national regulations (see section 13). Do not flush into surface water or sanitary sewer system. If the product contaminates rivers and lakes or drains inform respective authorities.

### SECTION 7: HANDLING AND STORAGE

**Safe handling advice:**
Ensure all equipment is electrically grounded before beginning transfer operations. Keep away from sources of ignition – No smoking. Keep container tightly closed. The use of foam glass as an insulation material can reduce the risk of such spontaneous combustion. Insulation material soaked with the product must be replaced with new insulation material as soon as possible.

**Storage / Transport pressure**
Ambient

**Load / Unload temperature**
Ambient

### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

**ENGINEERING MEASURES**
Air contaminant levels should be controlled below the PEL or TLV for this product (see exposure guidelines). Provide adequate ventilation. Use explosion-proof electrical/ventilation/lighting equipment.

**Skin**
Wear suitable protective clothing, gloves and eye/face protection

**Inhalation**
Respiratory protection is normally not required except in emergencies or when conditions cause excessive airborne levels of mists or vapors. Use NIOSH approved respiratory protection.

**EXPOSURE GUIDELINES**
Contains no substances with occupational exposure limit values.

SECTION 10: STABILITY AND REACTIVITY

Reactivity
Stable at normal ambient temperature and pressure

Chemical stability:
Stable if stored and applied as directed

Hazardous polymerization:
Will not occur.

Conditions to avoid:
Direct heating, dirt, chemical contamination, sunlight, UV or ionizing radiation. Extremes of temperature and direct sunlight.

Hazardous decomposition products
No decomposition if stored normally. Stable under normal conditions. Use at elevated temperatures can lead to thermal decomposition and the formation of low-boiling and high-boiling secondary products (e.g. hydrocarbons). During removal of low-boiling decomposition products from the system, appropriate risk management measures for flammable liquids must be applied.

Materials to avoid
Strong oxidizing agents

Hazardous polymerization
None
