5/2/2007

Dear Sir/Madam

This is in response to your request for a Material Safety Data Sheet [MSDS] as required by provisions of OSHA's Hazard Communication Standard.

As you probably know, if a product is classified as an "article" as defined in the standard, an MSDS would not be required. An "article" is defined as any manufactured item other than a fluid or particle which, 1) is formed to a specific shape or design during manufacture, 2) has end use function (s) dependent in whole or in part upon its shape or design during end use, and 3) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical and does not pose a physical hazard or health risk to employees (29CFR1910.1200 (c)).

**HP260T**

We have concluded that the product (s) for which you requested an MSDS [listed above] is/are an article (s) as defined above.

MSDSs for our products are available via the internet at: [www.mancomsds.com](http://www.mancomsds.com)

If you have any questions or believe you have received this letter in error, please contact the undersigned at 440-937-7241.

Sincerely,

*Robert W. Kern*

Director, Safety, Health and Environment
