## Novasheen™

### Vinyl Cleaner

Novasheen is designed to penetrate and protect all types of vinyl, rubber, plastic and finished leather. It contains special polymers and polysiloxanes that filter out harmful air particles and solar light. Surfaces will shine and look new. Novasheen resists destructive ozone, oxygen and ultraviolet rays which dry out and crack or dull vinyl surfaces. Special humectants and moisturizers have been formulated into Novasheen to revive and restore vinyl surfaces. It also contains a special antistat that prevents dust and dirt from collecting on the treated surfaces. Excellent for use on vinyl, finished wood, plastic, rubber, paneling, desks, luggage, chairs, cabinets, tires, landeau tops, dashboards, fiberglass, book cases, simulated wood and many more hard surfaces not harmed by water. Novasheen cleans and protects all in one step. Simply apply and wipe away soils. The result will be a surface with a clean, protective shine. CAUTION: Do not use Novasheen on floors.
